DETAILED ACTION

Response to Amendment

1. This office action is in response to the amendments received on 02/06/2009.

Allowable Subject Matter

2. Claims 20-29 allowed. The following is an examiner's statement of reasons for allowance: as to claim 20, a comprehensive search of prior art of record failed to teach, either alone or in combination, an apparatus for assigning multi-paths to rake receiver fingers, the apparatus comprising: a processor which includes a pilot path search scheduler for receiving signals and generating scheduling data; a memory device for receiving the scheduling data and storing the results of a pilot path search process, wherein the memory device has a second portion for storing the results of a pilot strength measurement (PSM) process running on the processor, wherein the processor implements a path position detection process and a finger assignment process for providing an assignment to a Rake finger pool, the path position detection process searching for all multi-paths for a plurality of wireless transmit/receive units in a round-robin search order; and a path search vector correlator grid for receiving scheduling data and providing an output which is evaluated by the PSM process to generate evaluation results which are stored in the second portion of the memory device for access by the path position detection process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2611

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (US 2003/0142732, this reference fails to teach the limitations regarding the first and second portions of the memory and also the limitations regarding the path position detection process).
